Comprehensive assessment solutions for teachers and students

Edmentum™ Accucess is a diagnostic assessment solution that quickly and efficiently places learners at grade level in reading, writing, and math. In addition to assessing student proficiencies, the program prescribes rigorous content that fills learning gaps and personalizes instruction, bringing students up to grade level. Educators can use Edmentum Accucess to evaluate student knowledge and skills before beginning an instructional unit or semester. Results can be used to identify areas needing special emphasis and focus for either individual students or an entire class.

What it is

• Determines student proficiency and achievement in key subject areas, including language arts, reading skills and comprehension, and math
• Provides teachers formative assessments and prescribed instruction all in one solution
• Identifies learning gaps and prescribes rigorous, researched-based Plato Courseware curriculum to ensure improved student performance

Why it works

• Evaluates student skill levels before beginning a program and aids educators in developing an instructional plan
• Identifies skill levels of individual students or an entire classroom
• Automatically assigns a personalized learning plan into Plato Courseware curriculum to remediate as needed
• Helps teachers personalize learning for their entire class and individual students, resulting in improved class and student performance
Getting started in Edmentum™ Accucess is as easy as 1-2-3

Edmentum™ Accucess’ adaptive diagnostic assessments determine student proficiency and achievement in key subject areas. Students are placed within Plato Courseware and assigned a grade level equivalent based on their performance. Edmentum Accucess also has the option to automatically assign a personalized learning plan, or prescription, in the Plato Courseware curriculum to remediate objectives in which students are struggling and move them back up to grade level.

Students begin Accucess by taking one or more subject-specific tests to determine their curriculum level. Upon completion of the test, Plato Courseware automatically generates an individual prescriptive learning path based on the student’s performance. Students then complete their prescriptive learning path within Plato Courseware.
